

Topic of the month: Maneuvering Flight

More than 25% of general aviation fatal accidents occur in the maneuvering phase of flight. Of those accidents – half involve stall/spin scenarios. Technology such as angle of attack indicators is increasingly affordable for GA pilots and will be covered in a separate Topic of the Month presentation. Pizza at 1800, presentation at 1845. If you plan to enjoy the pizza, please give us a call at Pelican Aviation so we can order enough.

Directions: Seminar held at Pelican Aviation's Hangar

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
